

Lubricant storage containers offer a fully sealed system to keep dirt out and reduce spills.

- Ideal for anyone using lube oils, hydraulic oils, gear oils, motor oils, and coolants.
- Containers are non-reactive high density polyethylene and are built to last. They are easy to use and carry and offer a convenient content identification system. Non-rusting HDPE makes cleaning simple.
- HDPE lids offer a fully sealed system using Nitrile (Buna N) o-rings.
- Quick fill port minimizes exposure to airborne contaminants by eliminating the need to remove the entire lid during refilling.
- Flip-switch activated breather vent eliminates the need to hold down a spring-loaded venting button. This gives users a safe, firm grip while providing smooth-flow pouring.
- "No Mistake" content identification system: Eight changeable colored bands around lid are included. Bands match to colored identification cards in container pouch.

FACT:
Lubrication contamination is a leading cause of machinery failure.
It is a better practice to invest in ways to keep contamination out of equipment rather than remove the contamination after ingress.

LubeRite™ Drums*

Capacity	Nominal Dimensions - (mm) H X W X L	Model No.
2 Quart (2 Liter) Drum	250 x 135 x 135	17001
5 Quart (5 Liter) Drum	290 x 175 x 175	17002
10 Quart (10 Liter) Drum	375 x 220 x 270	17003

*All drums come with Standard Data Pouch with 8 color choices.

LubeRite™ Lids**

Description	Dimensions (mm)	Model No.
Pour Lid w/1/4" (6mm) Nozzle	215 x 143 x 333	17004
Pour Lid w/1/2" (12mm) Nozzle	215 x 143 x 333	17005
Pour Lid w/1" (25mm) Nozzle	215 x 143 x 333	17006
Pump/Storage Lid	127 x 146 x 171	17007

**All lids come with 8 colored bands.

**100% Seamless
Chemical Resistance AND Corrosion protection**

Test with more than 300 chemicals and are suitable for :
Actone, Hydrochloric Acid, Hydrogen Chloride, Phosphoric Acid and More.

- Flame-coated polyethylene thermoplastic liner is completely free from pinholes and defects and adheres totally to every interior surface - including shelves
- 18-gauge, double wall, all welded steel construction holds squareness to stand up to heavy use while offering proven fire protection.
- Specially formulated all-epoxy powder coat paint retains high gloss and provides long life and extra protection from corrosion.
- Unique ChemCor polyethylene thermoplastic seamless liner protects all interior cabinet surfaces from rust and corrosion
- Six lab-coated colors to coordinate with existing case work in nineteen convenient sizes including ADA compliant height.
- Easy close, self-latching doors ensure complete closure so the three point latching system works the first time and every time.
- Cabinets are fully compliant with NFPA Code 30 and prevailing OSHA standards.
- Most are FM approved and self-close models conform to the Uniform Fire Code.
- Justrite's exclusive 10 Years Warranty and third party (FM) approval is your guarantee of long life and exceptional performance.
